PROFESSIONAL SUMMARY

PHP Developer with **2+ years of hands-on experience** building and maintaining production **Laravel backend systems** for HR/CRM, logistics, and real-estate platforms. Strong background in **PHP, REST API design, PostgreSQL/MySQL database design, authentication & authorization, background jobs, and real-time (WebSocket) features**. Currently leading backend development of an internal HRM/CRM platform serving **5,000+ employee records across 10+ organizations**, with a consistent track record of diagnosing business-critical production issues and improving backend architecture as systems scale. Combines active industry experience with ongoing formal study in Software Engineering, staying current with modern backend practices, data structures, and algorithms.

PROFESSIONAL EXPERIENCE

PHP Developer (Lead Backend Developer) — CityNet, Burgutsoft Team

Oct 2025 – Present

Tashkent, Uzbekistan

- Lead backend development of MyOffice, an internal HRM/CRM platform built in **PHP/Laravel and PostgreSQL**, scaling it to support **10+ organizations and 5,000+ employee records** without service disruption.
- Designed and built an attendance module handling employee check-in/check-out events, cutting manual attendance tracking effort by automating check-in/check-out capture and report generation for HR teams.
- Built a payroll and accounting module that automatically calculates employee compensation from tracked working hours and business rules, removing manual payroll calculation for 10+ client organizations.
- Implemented PDF and Excel export functionality for contracts, applications, and payroll reports, reducing manual document preparation for HR and finance staff.
- Integrated real-time notifications using **Laravel Echo and Pusher**, improving in-app response time to workflow events across the platform.
- Diagnosed and resolved business-critical production issues affecting data consistency and core workflows, protecting payroll and attendance data integrity for 5,000+ employee records.
- Contributed to backend architecture and database design decisions as the platform expanded from a single organization to 10+ client organizations.

PHP Developer — Mostbyte

Feb 2025 – Sep 2025

Remote, Tashkent, Uzbekistan

- Developed backend logistics functionality in **Laravel** for contract management, shipment statuses, and refund processing.
- Implemented multi-currency payment logic with exchange-rate calculations and validation, eliminating currency-conversion errors in cross-border transactions.
- Built and maintained **REST API endpoints** and backend business logic powering core logistics workflows.
- Generated PDF and Excel documents for contracts and operational reports used by operations teams.
- Implemented real-time updates and notifications using **Laravel Echo and Pusher**.
- Optimized **PostgreSQL/MySQL** queries and data flows, reducing query response times and improving overall application performance.
- Diagnosed and fixed production bugs across backend components while preserving existing functionality and uptime.

Freelance PHP Developer — Self-employed

Dec 2024 – Jan 2025

Remote

- Delivered **Laravel** backend solutions and Vue.js interfaces for small-business clients on fixed-scope engagements.
- Built reusable backend-driven UI components for contracts, plan views, and filtering interfaces.
- Configured and deployed applications using **Laravel Forge, Nginx, and Supervisor**, streamlining client release workflows.
- Worked directly with clients to translate business requirements into working backend features.

PHP Developer — Dora System

Oct 2024 – Nov 2024

Tashkent, Uzbekistan

- Developed backend features in **Laravel** for real-estate management and apartment sales workflows.
- Implemented backend sales validation logic and business rules governing apartment availability and pricing.
- Enhanced apartment floor-plan visualizations, including auto-scaling for Genplan layouts.
- Contributed backend improvements that supported frontend-facing sales tools.

Junior PHP Developer — Sayyid Solution

Aug 2024 – Sep 2024

Tashkent, Uzbekistan

- Assisted with **Laravel** backend development and production bug fixing under senior developer guidance.
- Implemented and maintained application modules following established coding standards.
- Collaborated with the development team using **Git** and Agile workflows.

SELECTED PROJECTS

MyOffice — HRM/CRM Platform (Backend Lead)

PHP · Laravel · PostgreSQL · Redis · REST API · WebSockets · Vue.js

Internal HRM/CRM backend serving 5,000+ employee records across 10+ organizations — covering employee management, attendance tracking, payroll calculation, contract/document generation, PDF/Excel reporting, real-time notifications, and role-based access control.

Personal Website & Technical Blog — otashenko.uz

Technical blog covering PHP/Laravel backend development plus algorithm and data-structure problem write-ups, including solutions implemented in Go.

GitHub — @otabek-shavkatov

Personal repository of Laravel/PHP projects and algorithmic problem-solving exercises, primarily implemented in Go.

YouTube — @otabekshavkatov1382

Uzbek-language tutorials covering Laravel CRUD, REST APIs, queues, DTOs, Excel/PDF export, and Spatie packages, alongside algorithmic problem-solving walkthroughs in Go.

TECHNICAL SKILLS

Backend:

PHP, Laravel, REST APIs, MySQL, PostgreSQL, Redis

Architecture:

API Design, Authentication & Authorization, Database Design, Background Jobs, Queues, Real-time Applications, Third-party Integrations

DevOps & Tools:

Docker, Git, Laravel Forge, Nginx, Supervisor

Frontend (supporting):

Vue.js, JavaScript (ES6+), Tailwind CSS, Bootstrap

Also practicing:

Go — algorithmic problem solving & data structures

EDUCATION

Tashkent University of Information Technologies (TATU)

B.Sc. Software Engineering (Remote) — 1st-year student, 2025 – Present

Pursuing formal studies in parallel with full-time professional backend development experience since 2024.
