Professional Summary

Full-stack Engineer (Laravel + Vue.js) with experience in logistics, real estate, and HR/CRM systems, building REST APIs, integrating real-time features, and automating deployment. Currently lead developer of an internal HRM/CRM platform serving 5,000+ employee records across 10+ organizations. Strong focus on writing maintainable code and solving real business problems.

Experience

Software Engineer (Lead Developer) — CityNet — Burgutsoft Team *On-site, Tashkent, Uzbekistan*

Oct. 2025 – Present

- Acting as lead developer on "MyOffice", an internal HRM/CRM SaaS platform built on Laravel and PostgreSQL.
- Designed and built a time-tracking module recording employee check-in/check-out events and generating attendance reports for management.
- Built an accounting/payroll module that calculates monthly salaries automatically based on tracked working hours.
- Manage an employee database module holding 5,000+ employee records, currently in use by 10+ organizations and expanding.
- Built PDF and Excel exports for contracts, applications, and reports.
- Integrated real-time notifications using Laravel Echo and Pusher.
- Enhanced apartment floor-plan visualizations with Genplan auto-scaling.
- Fixed critical UI and backend bugs to improve data consistency.

Software Engineer — Mostbyte *Remote, Tashkent, Uzbekistan*

Feb. 2025 – Sep. 2025

- Developed logistics modules covering contracts, statuses, and refunds.
- Implemented multi-currency payment logic with exchange-rate calculations.
- Built PDF and Excel exports for contracts, applications, and reports.
- Integrated real-time notifications (Laravel Echo, Pusher).
- Enhanced apartment floor-plan visualizations with Genplan auto-scaling.
- Fixed critical UI and backend bugs for better data consistency.

Freelance Developer — Self-employed *Remote*

Dec. 2024 – Jan. 2025

- Delivered Laravel + Vue.js solutions for small business clients.
- Built reusable UI components (contracts, plan view, filters).
- Managed server setups (Laravel Forge, Supervisor, Nginx).

Software Engineer — Dora System *Tashkent, Uzbekistan*

Oct. 2024 – Nov. 2024

- Built modules for real estate management workflows.
- Enhanced Laravel-based sales validation and apartment visualizations.
- Contributed to UI improvements for contracts and plan view.

Junior Software Engineer — Sayyid Solution *Tashkent, Uzbekistan*

Aug. 2024 – Sep. 2024

- Assisted in backend development and bug fixing.
- Supported senior developers on Laravel-based modules.
- Collaborated in an Agile environment using Git workflows.

Side Projects

Personal Website — otashenko.uz

- Official personal site featuring technical blog posts and articles on programming.
- Publishes algorithmic problem write-ups and solutions.

YouTube Channel — [@otabekshavkatov1382](https://www.youtube.com/@otabekshavkatov1382)

- Laravel & Vue.js tutorials in Uzbek: CRUD, Queues, DTOs, REST APIs, Excel/PDF export, and Spatie packages.

GitHub —

- Previous account (70+ public repositories) was suspended and is no longer accessible.
- New account: github.com/otabek-shavkatov
